Architecte Cloud (DevSecOps)

Since 2022 Jus Mundi Paris, France

- Focus: AI transition and website hosting for international law & arbitration platform (jusmundi.com)
- Business protection: Vulnerability scanning, secrets management, access controls, anti scraping. First IA tech compliant ISO 42001, 27001, SOC2, GDPR
- Orchestration: Docker images, Nomad / K8s clusters (networking, storage, observability), SLO/SLI
- SDLC: Process standardization, quality metrics, cross-team coordination with Dev and Data Science
- Stack: Microservices in Python, Go, Nuxt, PHP; JusMundi AI and optimized search for international legal content
- Business continuity: High security standards, support fo

Architecte d'intégration Cloud

From 2012 to 2022

Finastra (ex-Misys puis Thomson Reuters) Paris, France

- Focus: Digital transformation and cloud migration - Treasury & Capital Markets
- Introduction of continuous integration and automation
- Pioneered Jenkins pipelines and Ansible; reduced integration issues by 60%
- Security: SAST/DAST, Klocwork, Fuzzing, secret detection, vulnerability management
- Collaboration with development, QA, and operations for DevSecOps best practices

Senior Software Engineer

From 2007 to 2012 Finastra Paris

- Focus: Stock and accounting modules - Kondor+ Back-Office (K+TP)
- 3-tier architecture: C++ business services, Java J2EE, CORBA middleware
- Stock management with real-time inventory; automatic balance sheet and off-balance sheet entries (regulatory compliance)
- Performance optimization for high-volume transaction processing

Ingénieur logiciel

From 2005 to 2007

Société Générale Corporate & Investment Banking (via ESN) Paris, France

- Focus: Back-office information systems (EOLE, GATE)
- Development and maintenance in C, PL/SQL, Java; Oracle 8i to 10g migration; True64 to Sun Solaris migration
- Level 2 support, production incidents, requirements analysis with business analysts

Education

● Engineering Degree in Computer Science (Diplôme d'Ingénieur)

From 1999 to 2004

EFREI - École d'Ingénieurs Généralistes Computer Science Paris, France

- Key Courses: Software Engineering, Database Systems, Network Architecture, Algorithms & Data Structures, Object-Oriented Programming

Computer skills

Cybersécurité

Advanced: WAF, SAST, DAST, PfSense

AI

Advanced: GPU, Fast API MCP, LiteLLM

Orchestration

Expert: Nomad, Kubernetes, Ansible, Terraform

Programming Languages

Advanced: Java, C++, Python, Shell

Release

Expert: GitLab, Jenkins, Docker

Skills

Digital Transformation

Containerization
